VLN
VLN Task Formulations and Benchmarks
VLN Task Definition
Receiving Language Instructions
Navigates through the Environment
Reaching the Destination
Benchmarks
Criterion
The World Where Navigation Occurs
The Type of Human Interaction Involved
The Types, Action Space, and Addition Tasks of the VLN Agent
The Dataset Collection
Representative Benchmarks
Room-to-Room (R2R)
Room-across-Room (RxR)
VLN-DE
VLN-CE
Robo-VLN
Evaluation Metrics
Navigation Error (NE)
Success Rate (SR)
Success Rate Weighted Path Length (SPL)
Other Metrics
Coverage Weighted by Length Score (CLS)
Normalized Dynamic Time Warping (nDTW)
Normalized Dynamic Time Warping Weighted by Success Rate (sDTW)
Foundation Models
Text-Only Foundation Models
BERT
GPT-3
Vision-Language Foundation Models
LXMERT
CLIP
GPT-4
World Model: Learning and Representing the Visual Environments
History and Memory
History Encoding
Encoding the Navigation History in Recurrently Updated State Tokens
Encodes Navigation History as a Sequence with Multi-modal Transformer
Graph-Based History
Topological Graph
Top-Down View Information
Grid Map
Semantic Map
Local Metrics Map
Loacl Neighborhood Map
Generalization across Environments
Pre-trained Visual Representation
Environment Augmentation
Human Model: Interpreting and Communicating with Humans
Ambiguous Instructions
Perceptual Context and Commonsense Knowledge
Large-Scale Cross-modal Pre-trained Models
LLMs
Information Seeking
Deciding When to Ask for Help
Generating Information-Seeking Questions
Developing an Oracle That Provides the Queried Information
Generalization of Grounded Instructions
Pre-trained Text Representations
Instruction Synthesis
Offline Instruction Generator
Online Instruction Generator
VLN Agent: Learning an Embodied Agent for Reasoning and Planning
Grounding and Reasoning
Explicit Semantic Grounding
Pre-training VLN Foundation Models
Planning
Graph-based Planner
LLM-based Planner
Foundation Models as VLN Agents
VLMs as Agents
LLMs as Agents
Challenges and Future Directions
Benchmarks: Limitations of Data and Task
Unified and Realistic Tasks and Platforms
Dynamic Environment
Indoors to Outdoors
World Model: From 2D to 3D
Human Model: From Instruction to Dialogue
Speaker-Listener Paradigm
Open-Ended Dialogue
Agent Model: Adapting Foundation Models for VLN
Lack of Embodied Experience
Hallucination Issue
LLMs in Planning and Reasoning
Deployment: From Simulation to Real Robots
Perception Gap
Embodiment Gap
Broader Impact
Ethical Implications
Legal Implications
Societal Implications
